Question 1: Using the hash function 'key mod 7', insert the following sequence of keys in the hash table 50, 700, 76, 85, 92, 73 and 101 Use chaining technique for collision resolution

Answer :

Hash function : "key mod 7"

Insert : 50, 700, 76, 85, 92, 73 and 101

$$50 \bmod 7 = 1$$

$$76 \bmod 7 = 6$$

$$92 \bmod 7 = 1$$

$$700 \bmod 7 = 0$$

$$85 \bmod 7 = 1$$

$$73 \bmod 7 = 3$$

$$101 \bmod 7 = 3$$

The hash table has 7 slots (0 to 6), and collisions are resolved by chaining.

0	700 [1]
1	50 [1] -> 85 [1] -> 92 [1]
2	
3	73 [1] -> 101 [1]
4	
5	
6	76 [1]
